Viking Ashanti Background

Viking Ashanti's Akoase gold project in southern Ghana contains a JORC classified, inferred resource of 500,000 ounces of gold based on 13Mt of ore @ 1.2g/t. Viking Ashanti's primary objective is to expand the resource to at least 1 million ounces of gold. At least 13,000 m of RC drilling is planned along with 2,500 m of diamond drilling at Akoase with a further 14,000m RC and 2,500m diamond drilling at West Star and Blue River through to May 2012.

The Akoase project is just 25km from Newmont Mining's 8.7M oz Akyem gold project while the West Star/Blue River projects are 15 km from the 2M oz Salman/Anwia project, operated by ASX listed Adamus Resources. Ghana also hosts the 60M oz Obuasi deposit (AngloGold Ashanti), 40M oz Tarkwa deposit (GoldFields) and the 17M oz Ahafo deposit (Newmont).

Ghana is socially and politically stable, operates under a well established Westminster legal system, has excellent internal infrastructure with a 25 year history of modern mining and a substantial internal skills base to support mining.
