About mining in Ghana

Ghana is an English speaking country located on the west coast of Africa, which achieved independence in 1957. Ghana is socially and politically stable, operates under a well-established Westminster legal system, has excellent internal infrastructure with a 25 year history of modern mining and a substantial internal skills base to support the resources sector.

Ghana is a significant gold producer, with 3Moz gold production in 2011, which ranks #2 in Africa and #9 in the world. A broad mix of multi-national mining companies, mid-tier gold producers and junior explorers operate successfully in the country.

Our projects in Ghana

Akoase Gold Project:

Viking Ashanti's most advanced project is the 100% owned Akoase gold project, located at the northeastern end of the Ashanti Gold Belt in southern Ghana. The project contains an established near surface Inferred resource of 704,000 oz of contained gold at a 0.5 g/t Au cut-off at the Akoase East deposit. Viking has completed 8,000 m of RC drilling and 3,000 m of diamond drilling at Akoase since acquisition. Further drilling to the northeast and at depth is expected to extend the known mineralized zones.

West Star/Blue River project:

Viking's other major area of interest is the West Star/Blue River project, located adjacent to the Adamus' 2 million ounce Nzema gold mine at the southwestern end of the Ashanti Gold Belt in southern Ghana. Viking has 100% interest in the hard rock rights of the licences. Extensive soil geochemistry and drilling programs have been completed, identifying the 17 strike km of the Salman shear zone as a prime exploration target.
