

ASX Announcement

21 November 2014

ASX Code: VKA

Drilling Underway at Berkh Uul Coal Project, Mongolia

Viking Mines Limited (ASX: VKA, the “**Company**” or “**Viking**”) advises that it has commenced its planned drilling program at the Company’s 100% owned Berkh Uul coal project in northern Mongolia (Figure 1).

The drilling program is designed to infill and extend the existing drill coverage, commencing in the north-east of the licence area where there is pre-existing drilling within the confines of the current 38Mt resource. The proposed drilling will progress to the south, targeting extensions to the deposit to add to the current resource.

Selected drill core samples will be transported to Ulaanbaatar on completion of the program for testing by an accredited analytical laboratory.

Outcropping Coal at Berkh Uul

About the Berkh Uul Coal Project – Mongolia (Viking 100%)

Berkh Uul is located 400 km north of Ulaanbaatar in north-eastern Mongolia within the Orkhon-Selege coal district and within 20km of the Russian border. The project is within 40km of rail access into Russian off-take markets, in close proximity to water, infrastructure and transport.

The deposit consists of shallow, consistent coal seams of high quality bituminous coal amenable to low strip ratio open pit mining.

Local cement works and power stations desire Berkh Uul coal, due to its low ash and relatively high calorific value. To date four Memoranda of Understanding for the supply of coal from Berkh Uul have been signed with local industrial end-users.
