Sale of Akoase Gold Project Update

The Board of Viking Mines Limited (**Viking**: VKA.AU) advises that Akoase Resources Limited (**ARL**) has commenced making payments to honour its contractual obligation to pay the second instalment of US\$1,710,000 as required under the sale and purchase agreement for the Akoase Gold Project in Ghana, West Africa (**Sale Agreement**).

To date ARL has paid Viking US\$360,000 of the overdue amount. Within the constraints of the recent Chinese central Bank restrictions, Viking and ARL are negotiating a new payment schedule for the balance of the overdue US\$1,350,000 to be paid to Viking within as short a period as possible.

Notwithstanding the above and in accordance with the Sale Agreement Viking has confirmed to ARL that it remains in default under the Sale Agreement.

Akoase Sale Transaction Details

In June 2015 Viking announced the sale of the Akoase gold project for total sales consideration of US\$10 million to be received as follows:

- US\$650,000 - received by Viking
- US\$1,350,000 now overdue
- US\$6,000,000 to be paid in cash within 5 days after all conditions precedent have been satisfied. The principal remaining condition relates to Viking obtaining the requisite Ghanaian Minerals Commission and government approvals. This process is expected to take approximately 3 months from lodgement of the necessary documents to obtain the Minister of Mines approval to the transfer of the Akoase licences to ARL. Viking will commence the preparation of these documents
- US\$2,000,000 to be paid in cash as a gold production royalty

About Akoase

The Akoase Project is an advanced exploration gold project located approximately 125km northwest of Accra in the Ashanti Gold Belt in Ghana. The Project comprises the Akoase East (JORC (2012) classified Inferred resource of 790,000 ounces), Akoase South-East and Akoase West licences. Akoase is 25km from Newmont's 8 million ounce Akyem Gold Mine.

The acquisition of Akoase will consolidate the ownership of the Sian and Akoase gold resources providing critical mass for the ultimate development of a producing mine.
