

ASX Announcement

21 July 2016

ASX Code: VKA

Quarterly Report for the period ended 30 June 2016

During the three months to 30 June, 2016, Perth-based Viking Mines Ltd (Viking or the Company) activity was focussed on reviewing new mining project opportunities, while progressing Government approval of the sale agreement for the Akoase gold project in Ghana.

1. Akoase Gold Project (Ghana, VKA 100% - reducing to 0% upon completion of sale)

During the June 2016 quarter the Company made significant progress in obtaining the necessary government approvals to transfer the Akoase tenements to Akoase Resources Limited (**ARL**) such that it can complete the US\$10 million sale of these tenements. This is the only remaining condition precedent to completion of the sale.

Since lodging the necessary applications and documents required to obtain the Minister of Mines approval to the transfer of the Akoase licences to ARL, Viking has responded to various Minerals Commission requisitions for additional information. Viking believes that obtaining a tax clearance for its Ghanaian incorporated subsidiary from the Ghana Revenue Authority remains the only outstanding matter to be completed before Ministerial approval can be obtained. This necessary tax clearance certificate is expected to be received in the September quarter.

Once the necessary Ministerial approvals for the transfer of the tenements are received a further US\$6 million in Akoase sales proceeds becomes immediately payable to Viking. Non-payment of this amount may void the sale transaction and the Akoase project ownership would then remain with Viking. In this event there is no obligation upon Viking to refund any portion of the US\$2 million deposit already paid by ARL.

Akoase Sale Transaction Details

In June 2015 Viking announced the sale of the Akoase gold project for total sales consideration of US\$10 million to be received as follows:

- US\$2,000,000 – received by Viking
- US\$6,000,000 to be paid in cash within 5 days after all conditions precedent have been satisfied. The only remaining conditions relate to Viking obtaining the requisite Ghanaian Minerals Commission and Minister of Mines approvals as noted above.
- US\$ 2,000,000 to be paid in cash as a gold production royalty

2. West Star/Blue River Joint Venture Gold Project (Ghana, VKA 100% hard rock)

Viking has 100% of the hard rock rights over the West Star/ Blue River project via joint venture agreements with the tenement holder. The tenement holder and Joint Venture partner owns the alluvial rights on the West Star/Blue River project. As a result of alleged non-compliance with the Mining Act the tenement holder has received formal notification from the Minerals Commission that the tenements have been rescinded/or will not be renewed.

Viking has sought legal opinion and made submissions to the Minerals Commission in an endeavour to protect its hard rock interests. Until this matter is resolved such that Viking project rights are confirmed Viking is unable to undertake any further exploration activities on these tenements. It is possible that Viking may not have its hard rock rights in this area re-affirmed.

Viking had planned a reconnaissance drill program to test a strong gold in soil anomaly located adjacent to the Salman shear zone in the northern part of the West Star prospecting licence.

3. Berkh Uul Coal Project (Mongolia, VKA 100%)

During the quarter field inspection of the project area was undertaken by two representatives from the Ministry of Tourism, Green Development and Environment, accompanied by two Company representatives.

This follows a previously reported Government Resolution that licence areas in headwater zones and river basins are to be annexed and revoked. The Company has been advised by the Ministry of Tourism, Green Development and Environment that approximately 53% of the Berkh Uul prospecting licence falls within a headwaters of rivers zone. This government determination impacts upon the Company's current coal resource.

The Mineral Resource Authority of Mongolia (MRAM) and the Ministry of Tourism, Green Development and Environment indicated they were prepared to review the exclusion zones at Berkh Uul. Viking lodged a formal written submission with MRAM and a Government working group has been formed to review the submission.

Viking expects to receive a formal response on the status of the government review process, following the recently completed field inspection, in the next quarter.

4. Khonkhor Zag Coal Project (Mongolia, VKA 100%)

No on-ground work was undertaken on the project during the quarter.

5. Corporate

During the quarter the Company accelerated and intensified its review of mineral project farm-in/acquisition opportunities in the expectation that the final Akoase sale proceeds will be received during the September quarter.

No project reviews are currently at an advanced stage of consideration. Viking will continue to pursue these and any other opportunities, which are complementary to its existing project portfolio and consistent with its core objective to acquire near term production assets with potential to deliver sustainable cash flow.

The Company has appointed corporate adviser Emerald Partners Pty Ltd to assist in the search for suitable new advanced mining projects. Emerald Partners advised the Company on its sale of the Akoase gold project and has previously been a corporate adviser to the Company.

Competent Persons Statement: The information in this Public Report that relates to gold Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr Peter McMickan, who is a Member of the Australasian Institute of Mining and Metallurgy. Mr McMickan is a full time employee of Viking Mines Limited. Mr McMickan has sufficient experience that is relevant to the style of mineralization and type of deposit under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr McMickan consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this Public Report that relates to coal Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr David Lorge, who is a Member of the Society of Mining, Metallurgy, and Exploration Inc. (SME) and a Fellow of the Society of Economic Geologists (SEG). Mr Lorge is a full time employee of RSC Consultants. Mr Lorge has sufficient experience that is relevant to the style of mineralization and type of deposit under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Lorge consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Forward Looking Statements: This document may include forward looking statements. Forward looking statements may include, but are not limited to statements concerning Viking Ashanti Limited's planned exploration programs and other statements that are not historical facts. When used in this document, words such as "could", "plan", "estimate", "expect", "intend", "may", "potential", "should", and similar expressions are forward looking statements. Although Viking Ashanti Limited believes that its expectations reflected in these forward looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward looking statements.

About the Akoase Gold Project

The Akoase Project is an advanced exploration gold project located approximately 125km northwest of Accra in Ghana. The Project comprises the Akoase East (JORC (2012) classified Inferred resource of 790,000 ounces), Akoase South-East and Akoase West licences. Akoase is 25km from Newmont's 8 million ounce Akyem Gold Mine, on the margins of the Ashanti Gold Belt, one of the most prolific gold bearing provinces in the world (Figure 2).

The information in this report concerning the Mineral Resources of Viking Mines is extracted from the report entitled "12% Increase to 790,000 oz in Gold Resource for Ghana Project" created on 4 October 2013 and is available to view on Viking Mines website at www.vikingmines.com. Viking Mines confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. Viking Mines confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

About the Berkh Uul Coal Project

Berkh Uul is located 400 km north of Ulaanbaatar in north-eastern Mongolia within the Orkhon-Selenge coal district and within 20km of the Russian border (Figures 1 and 3). The project is within 40km of rail access into Russian markets, in close proximity to water, infrastructure and transport.

The deposit consists of shallow, consistent coal seams of high quality bituminous coal amenable to low strip ratio open pit mining.

Discussions with nearby cement works and power stations confirm a local industrial demand for unwashed Berkh Uul coal, due to its low ash and relatively high calorific value. To date four Memoranda of Understanding for the supply of coal from Berkh Uul have been signed with local industrial end-users.

On 17 March, 2014, Viking announced a new Indicated and Inferred coal resource estimate, classified in accordance with the JORC (2012) Code, for the Berkh Uul coal project. The resource estimate was completed by consultancy group, RungePincockMinarco Ltd, and totals 38.3 Mt. Of this, 21.4Mt is classified as Indicated and 16.9Mt classified as Inferred. The coal is bituminous in rank (ASTM classification) with average in situ quality as follows: Total Moisture 19.8%, Calorific Value 5,323 kcal/kg (air dried basis, adb), Ash 15.5% (adb), and Total Sulphur 0.37% (adb).

The information in this Report concerning the Berkh Uul Mineral Resource is extracted from Viking's announcement to the ASX entitled "New 38.3Mt resource for Merger Company's Mongolian coal project" dated 17 March, 2014, and is available to view on Viking's website at www.vikingmines.com. Viking confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. Viking confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

Quarter ended ("current quarter")

30 June 2016

Consolidated statement of cash flows

	Current quarter \$A'000	Year to date (12 months) \$A'000
Cash flows related to operating activities		
1.1 Receipts from product sales and related debtors		
1.2 Payments for (a) exploration & evaluation (b) development (c) production (d) administration	(123)	(577)
1.3 Dividends received	(31)	(399)
1.4 Interest and other items of a similar nature received	3	4
1.5 Interest and other costs of finance paid		(8)
1.6 Income taxes paid	(13)	(13)
1.7 Other		
Net Operating Cash Flows	(164)	(993)
Cash flows related to investing activities		
1.8 Payment for purchases of: (a) prospects (b) equity investments (c) other fixed assets		
1.9 Proceeds from sale of: (a) prospects (b) equity investments (c) other fixed assets	(17)	2,158
1.10 Loans to other entities		
1.11 Loans repaid by other entities		
1.12 Other (provide details if material)		
Net investing cash flows	(17)	2,158
1.13 Total operating and investing cash flows (carried forward)	(181)	1,161

+ See chapter 19 for defined terms.

Appendix 5B
Mining exploration entity quarterly report

1.13	Total operating and investing cash flows (brought forward)	(181)	1,161
	Cash flows related to financing activities		
1.14	Proceeds from issues of shares, options, etc.		
1.15	Proceeds from sale of forfeited shares		
1.16	Proceeds from borrowings		30
1.17	Repayment of borrowings		(150)
1.18	Dividends paid		
1.19	Other - capital raising costs		
	Other – shares to be issued		
	Net financing cash flows		(120)
	Net increase (decrease) in cash held	(181)	1,041
1.20	Cash at beginning of quarter/year to date	1,482	297
1.21	Exchange rate adjustments to item 1.20	5	(32)
1.22	Cash at end of quarter	1,306	1,306

Payments to directors of the entity and associates of the directors

Payments to related entities of the entity and associates of the related entities

		Current quarter \$A'000
1.23	Aggregate amount of payments to the parties included in item 1.2	85
1.24	Aggregate amount of loans to the parties included in item 1.10	

1.25 Explanation necessary for an understanding of the transactions

Non-cash financing and investing activities

2.1 Details of financing and investing transactions which have had a material effect on consolidated assets and liabilities but did not involve cash flows

2.2 Details of outlays made by other entities to establish or increase their share in projects in which the reporting entity has an interest

+ See chapter 19 for defined terms.

Financing facilities available

Add notes as necessary for an understanding of the position.

	Amount available \$A'000	Amount used \$A'000
3.1 Loan facilities	-	-
3.2 Credit standby arrangements	-	-

Estimated cash outflows for next quarter

	\$A'000
4.1 Exploration and evaluation	50
4.2 Development	
4.3 Production	
4.4 Administration	50
Total	100

Reconciliation of cash

Reconciliation of cash at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts is as follows.

	Current quarter \$A'000	Previous quarter \$A'000
5.1 Cash on hand and at bank	581	576
5.2 Deposits at call	725	906
5.3 Bank overdraft		
5.4 Other (provide details)		
Total: cash at end of quarter (item 1.22)	1,306	1,482

Changes in interests in mining tenements

	Tenement reference	Nature of interest (note (2))	Interest at beginning of quarter	Interest at end of quarter
6.1	Interests in mining tenements relinquished, reduced or lapsed			
6.2	Interests in mining tenements acquired or increased			

+ See chapter 19 for defined terms.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
