

ASX Announcement

13 October 2017

ASX Code: VKA

Annual Report Amended Additional Information

Viking Mines Ltd (**Viking** or the **Company**) hereby releases amended commentary to relevant sections of its annual report that was released on 28 August 2017. The attached amended disclosures relate to the Annual Mineral Resources and Competent Person statements as required under Listing Rule 5.21.

Annual Mineral Resources Statement

There has been no change to the Company's mineral resource holdings compared to the previous financial year. The Mineral Resources statement for the Company, as at 30 June 2017 is summarized below.

1. Akoase Gold Project, southern Ghana, Viking 100% ownership reducing to 0% upon completion of sale

The Akoase East resource has been independently estimated by internationally recognized and qualified resource consultancy GHD Pty Ltd in accordance with the JORC (2012) Code. An Inferred mineral resource estimate of 20.6 Mt @ 1.2 g/t Au for 790,000 ounces of contained gold, at a 0.5 g/t Au cut-off was completed for the Akoase East deposit in September 2013 (Table 1).

The Akoase East resource estimate is based on geological, drilling and assay information up to the end of August 2013. It includes approximately 10,000 metres of historical Reverse Circulation (RC) drilling data, plus data from approximately 10,000 metres of RC and 3,000 metres of diamond drilling completed by Viking between 2010 and 2013.

Table 1: Akoase East JORC (2012) Inferred Resource Estimate (September 2013)

TOTAL			
Cut off (g/t Au)	Million tonnes	Au g/t	Oz Au (x 1,000)
0.4	21.6	1.2	800
0.5	20.6	1.2	790
0.75	16.9	1.3	710
1.0	12.0	1.5	570

BY WEATHERING TYPE			
Oxide			
Cut off (g/t Au)	Million tonnes	Au g/t	Oz Au (x 1,000)
0.4	5.9	1.2	220
0.5	5.7	1.2	217
0.75	4.6	1.3	194
1.0	3.2	1.5	156
Fresh			
Cut off (g/t Au)	Million tonnes	Au g/t	Oz Au (x 1,000)
0.4	15.6	1.2	581
0.5	14.8	1.2	570
0.75	12.3	1.3	518
1.0	8.7	1.5	417

Ordinary Kriging whole block estimates using 25mE x 25mN x 10mRL parent block dimensions. Reported using gold (Au) lower cut-off grades (preferred cut-off is 0.5 g/t Au). Using rounded figures in accordance with the Australian JORC Code (2012) guidance on Mineral Resource Reporting.

Viking is not aware of any new information or data that materially affects the above resource calculation, and that all material assumptions and technical parameters underpinning the estimated resource continue to apply and have not materially changed.

The Akoase East resource estimate and associated report was completed by internationally recognised resource consultants GHD Pty Ltd in September 2013. The resource estimate has been reviewed by Viking's Competent Person, Mr Peter McMickan, who is a full time employee of Viking Mines Ltd and a Member of the Australasian Institute of Mining and Metallurgy, member number 105742.

Mr McMickan is responsible for the Akoase East resource estimation and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and for the activity to report a mineral resource. Mr McMickan has approved the Akoase East resource estimation as outlined in this report in accordance with the requirements of the JORC Code (2012) and ASX Rules.

2. Berkh Uul Coal Project, northern Mongolia, Viking 100% ownership

An Indicated and Inferred coal resource estimate, classified in accordance with the JORC (2012) Code, for the Berkh Uul coal project was completed in March 2014. The resource estimate was completed for Auminco Mines Ltd by internationally recognized and qualified consultancy group, RungePincockMinarco Ltd, and totals 38.3 Mt. Of this, 21.4Mt is classified as Indicated and 16.9Mt classified as Inferred (Table 2). The coal is bituminous in

rank (ASTM classification) with average in situ quality as follows: Total Moisture 19.8%, Calorific Value 5,323 kcal/kg (air dried basis, adb), Ash 15.5% (adb), and Total Sulphur 0.37% (adb) (Table 3).

Tables 2 and 3: Berkh Uul JORC (2012) Indicated and Inferred Resource Estimate (February 2014)

Table 2: Berkh Uul JORC (2012) Coal Resource Tonnage (million tonnes in situ)					
Resource type	Seam	Measured	Indicated	Inferred	Total
Open Cut	1	–	4.4	3.5	7.9
	2	–	2.6	0.3	3.0
	OC subtotal	–	7.0	3.9	10.9
Underground	1	–	8.2	8.3	16.5
	2	–	6.2	4.8	10.9
	UG subtotal	–	14.4	13.1	27.4
Grand Total		–	21.4	16.9	38.3

Sum of columns may not equal the total due to rounding

Table 3: Berkh Uul JORC (2012) Coal Resource Quality

Resource type	category	Seam	TM (%)	IM (%)	Ash (% adb)	VM (% adb)	FC (% adb)	TS (% adb)	CV (kcal/kg adb)	Rdis
Open Cut	Ind	1	20.8	13.5	14.4	32.6	39.5	0.34	5373	1.35
		2	21.0	13.7	9.8	34.9	41.6	0.35	5693	1.31
		subtotal	20.9	13.6	12.7	33.4	40.3	0.34	5493	1.33
	Inf	1	18.9	12.0	20.1	30.9	37.1	0.37	5011	1.39
		2	20.9	13.8	10.0	34.5	41.7	0.37	5684	1.32
		subtotal	19.1	12.1	19.2	31.2	37.5	0.37	5066	1.38
	OC subtotal		20.3	13.1	15.0	32.6	39.3	0.35	5342	1.35

		2	20.9	13.7	10.3	33.9	42.0	0.42	5681	1.32
		subtotal	19.7	12.8	15.2	32.4	39.6	0.37	5355	1.35
	Inf	1	18.7	12.0	19.6	31.0	37.4	0.35	5050	1.39
		2	21	13.8	10.6	33.8	41.8	0.43	5657	1.32
		subtotal	19.6	12.6	16.3	32.0	39.0	0.38	5272	1.36
	UG subtotal		19.6	12.7	15.7	32.2	39.3	0.38	5313	1.36
Grand Total			19.8	12.8	15.5	32.3	39.3	0.37	5323	1.35

Note: Air Dried Basis(adb); TM- total Moisture; IM-Inherent Moisture; VM-Volatile Matter; FC – Fixed Carbon; TS- Total Sulphur; CV- Calorific Value; Rdis- in situ Relative Density. Sum of columns may not equal the total due to rounding

The principal author of the Berkh Uul resource estimate and associated report is Mr Brendan Stats, who is a professional geologist with over 10 years' experience in mining and mineral resource estimation. Mr Stats is a Senior Geologist of RungePincokMinarco Pty Ltd and a Member of the Australasian Institute of Mining and Metallurgy member number 311313.

Mr Stats is responsible for the Berkh Uul resource estimation and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and for the activity to report a mineral resource. Mr Stats has approved the Berkh Uul resource estimation as outlined in this report in accordance with the requirements of the JORC Code (2012) and ASX Rules.

A summary of the main governance arrangements and internal controls that Viking has put in place with respect to its estimates of mineral resources and the estimation process include use of industry standard drilling and sub-sampling techniques, a chain of custody for sample integrity, use of standards, blanks and duplicates in sample analysis, internal database validation, use of internationally recognized independent resource consultants with internal peer review of estimation assumptions and techniques, and external review of the resource estimate by the Company's Competent Person.

The complete range of governance and internal controls for the resource estimates outlined above are included in Table 1 of ASX announcement dated 4 October 2013 for the Akoase East resource estimate, and Table 1 of ASX Announcement dated 17 March 2014 for the Berkh Uul resource estimate.

Forward Looking Statements:

This document may include forward looking statements. Forward looking statements may include, but are not limited to statements concerning Viking Mines Limited's planned exploration programs and other statements that are not historical facts. When used in this document, words such as "could", "plan", "estimate", "expect", "intend", "may", "potential", "should", and similar expressions are forward looking statements. Although Viking Mines Limited believes that its expectations reflected in these forward looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward looking statements.
